

MÜLAYİM EMRE CİHAN

FRONTEND WEB DEVELOPER

About

After a number of bachelor's degrees in security science, public administration, and psychological counselling. I realise that the computer science and software development is my real focus of interest. I have recently started learning to code in front-end environments.

I can describe myself as an ambitious individual who is eager to learn. I'd also describe myself as a social individual who enjoys being a team player. When it comes to my weaknesses, I find it hard to ignore small issues which ultimately turn into bigger problems. Finally my vision is all about productivity. I feel most satisfied when I create something. I want my projects to open doors to new explorations and creativity.

Software Skills

Html5, Css3, Bootstrap, Terminal, Npm, Yarn, JavaScript, Axios, Formik, React.js, React-Routes, UI,UX, Redux, Restful API, Git, Nodejs, Firebase, Tailwind

Certificates

Frontend Web Path

Patika.dev
